Termly maths updates from Bure Valley School

MESSAGE FROM MRS GRAVELING, MATHS LEAD

As the end of another busy term approaches, it has been lovely to reflect on all things mathematical from across the term.

Children continue to show enthusiasm across school for maths. Not only during lessons, but also in stopping me in the corridor or lunch hall to tell me about something they've worked on or achieved. In addition to this, throughout this term, I have been lucky enough to visit all classes across school and teach a maths lesson.

Next term will see Mr Warnes take over the reins of maths lead as I leave on maternity leave,. Mr Warnes did a fantastic job of looking after maths whilst I was on maternity leave before, so I know the subject is in safe hands. Look out for exciting competitions or challenges Mr Warnes sets throughout next term.

Homework Reminder

The expectation for **year 3 & 4** is to complete a set amount of time on TTRockstars each week.

For **year 5 & 6**, in addition to the set time for TTRockstars, they should complete a quiz set by the teacher on Google Classroom. This is with the exception of the daily homework set by year 6 in the build-up to SATs.

Maths Videos

As part of our effort to support both children and parents when using maths at home, a new set of maths videos are being recorded and produced. The aim of these videos is TO support learning at home and provide parents with a resource which enables them to see how their children are taught in school.

The videos will generally be 5-10 minutes long and provide parents with an explanation of how to approach different areas of maths. As well as outlining the process of a certain mathematical topic, key language and explanations are also modelled.

Please look out for these going 'live' early in the summer term. There will be a dedicated YouTube channel and available on the A Star Learning website.
